

## Public Meeting Report

---

<b>Project Name:</b>	Marine Corps Base Quantico Joint Land Use Study	<b>Meeting Dates:</b>	May 29, May 30, and June 12, 2013
<b>Subject/Purpose:</b>	Public Meeting Report	<b>Issuance Date:</b>	July 3, 2013

---

Public meetings were held on May 29<sup>th</sup>, May 30<sup>th</sup>, and June 12<sup>th</sup> to inform the public about the Marine Corps Base Quantico Joint Land Use Study (JLUS) and provide an opportunity for public comment and input. Public meeting notifications included several email broadcasts to committee members and stakeholder interviewees requesting that they further disseminate announcements to their constituencies; a public meeting announcement flyer; project website postings; and advertisements published in four local newspapers (*Prince William Times*, *Free Lance-Star*, *Stafford County Sun*, and *Fauquier Times-Democrat*). This memo provides an overview of the public input received during the comment period that ended June 30, 2013.

This memo is organized in the following sections:

- A. Meeting Overview
- B. Meeting Content
- C. Comment Forms
- D. Project Emails
- E. Media Coverage

This report does not include the results of the interactive exercise at each meeting which was meant to spur conversation, but was not a scientific survey or statistically valid.

May 29<sup>th</sup> at Hilldrup Moving & Storage, Stafford County

May 30<sup>th</sup> at the Edward L. Kelly Leadership Center, Prince William County

June 12<sup>th</sup> at the "Old" Cedar Run Rescue Squad Building, Fauquier County

## A. Meeting Overview

Meeting attendance for each meeting is noted below.

Date	Wednesday, May 29, 2013	Thursday, May 30, 2013	Wednesday, June 12, 2013
<b>Location</b>	Hilldrup Moving & Storage 4022 Jefferson Davis Highway Stafford, VA 22554	Edward L. Kelly Leadership Center 14715 Bristow Road Manassas, VA 20112	"Old" Cedar Run Rescue Squad Building 3558 Catlett Road Catlett, VA 20119

### Summary:

**Total Attendees: 126**

**Total Media Attendees: 4**

## B. Meeting Content

A consistent meeting format was used for all three meetings as described below:

- 1. Registration and Open House** – Participants registered at the sign-in table and were given printed comment forms to mail or hand in and a copy of the Presentation (participants at the May 29<sup>th</sup> meeting did not receive copies of the Presentation). Maps were displayed on boards for the public to view and comment on. Base personnel, locality staff and the consultants were available to answer questions.
- 2. Presentation** – AECOM presented an overview of the JLUS process, current status and presented the existing conditions data.
- 3. Interactive Exercise** – An interactive exercise using key pad technology was administered following the presentation and was intended to engage participants to ask questions and offer comments. The results of the exercise are not statistically valid. It was meant as an engagement exercise to spur public conversation, which it did.
- 4. Question and Answer Session** – During this period the public was invited to ask questions which were answered by the consultants and representatives from the base and the localities. The questions and comments made during the three meetings are listed below:

Wednesday, May 29, 2013

- It seems like the majority of the issues are related to either noise or traffic. Does the JLUS team have any data that can help mitigate these issues? For example, VDOT sets up car counters to get accurate traffic readings.
- Are noise complaints a concern/issue for the mission of the base in the future?
- During your presentation you mentioned that other studies had been done at other bases. Where can we find information on the other studies?

Thursday, May 30, 2013

- I live in Stafford, work in Prince William and drive past the base to get to and from work. Traffic on I-95 and Route 1 is bad and there are very few alternative routes. Stafford County continues to grow as does Prince William County. We need to look at other ways of getting past the base. My wife catches the train at the base, that is a great resource and not many bases have a commuter rail line that goes through it.
- You have a rail stop for VRE and the PRTC stops on the base, how can you promote that so we see better use out of it? Maybe the base can look at different strategies to improve traffic issues in the area, such as staggered schedules.

Wednesday, June 12, 2013

- I live in Stafford County and frequent the installation, traffic is a big issue. What is being done to get people on and off the base? What is going on with the interchange and are you working with VDOT to mitigate traffic issues?
- The community is not always aware of the economic impact that the base has on the surrounding areas. Can you go through some of that information so that the public is more familiar with it?
- We have learned what our concerns are during the survey portion of the presentation. What is the base's concern with development in Prince William and Fauquier Counties? What would be the impact of residential development to the base?
- Most of the presentation mentions the base wanting to preserve the land around it. What is the base's plan for land use within its perimeter? BRAC 2015 is coming,

what plans are being looked at in preparation for this? What is the hierarchy of noise levels at the base: aircraft, shooting range, etc.?

**C. Comment Forms**

At the three public meetings, two comment forms were submitted at the public meeting and two were submitted via the project website. The community had the opportunity to submit comments by mail or email until June 28, 2013.

<p><b>Question # 1</b>  <b>What concerns or issues do you have regarding your community and Marine Corps Base Quantico?</b></p>	<p><b>Question # 2</b>  <b>Please provide any other comments that you believe may assist us with the Marine Corps Base JLUS?</b></p>
<p><b>Comment Form 1</b>  <i>Received at public meeting on May 29, 2013</i></p> <p>The traffic congestion caused not only on the I-95 Rt.1 corridor but also the lack of attention to constructing a safe north/south route through the western portion of the base. Growth in Stafford continues to occur in the north western portions of Stafford County. Creating a four-lane highway using the current right-aways of 610 in Stafford and Rt. 612 in Fauquier seems like a feasible forward thinking solution. 610 west and 612 are congested each evening. The winding roads are dangerous</p>	<p>Option using existing right-aways from Tolula Road, MCB-1 and Rt. 619 in Prince William can also be a route that is expanded to have an additional north-south option. For traffic, I-95 and Rt. 1 cannot suffice and puts the 3+ million people (VA/DC) living north of Quantico into gridlock on a daily basis. Having additional north/south options of travel through the base eases congestion on 95/Rt. 1 and helps create another evacuation route in NoVA for residents in the event of a disaster in the DC metro area.</p>
<p><b>Comment Form 2</b>  <i>Received via the project website on May 30, 2013</i></p> <p>There needs to be better road systems traveling around the western portions of the base. Many people travel the western boarders along route 610 and 612 to head towards the northern parts of the region. These roads have become dangerous and were not designed to handle as much traffic as they get now. The counties and base need to widen and add lanes to these existing routes to make travel around the western base more safe and less congested.</p>	<p>I understand that noise may be an issue for some, but I live very close to the base border, near the ranges on the west side of the base, and to a LARGE portion of the community, noise is not an issue. The more important issue is traffic and travel around the base (especially the western side).</p>
<p><b>Comment Form 3</b>  <i>Received via the project website on June 11, 2013</i></p> <p>We own a home right outside of MCB in Fauquier County, but live in Pa now. We are interested in knowing what future MCB plans may affect our property in Fauquier County. We are unable to attend the public meetings in Va. but would like to be able to know what, if any, this JLUS means to us.</p>	
<p><b>Comment Form 4</b>  <i>Received at public meeting on June 12, 2013</i></p> <p>Only concern is that proper planning for development to occur.</p>	<p>The area at Quantico is very prime real estate. Development should be vitalized around for business. I personally think commercial should be looked upon more than residential with the large amount of growth in PW and Stafford. Possibility bringing traffic in opposite direction this is a great opportunity.</p>

## D. Project Emails

In addition to comments received during the public meetings, one email was received by [quanticoilus@aecom.com](mailto:quanticoilus@aecom.com). Names and contact information have been withheld for privacy reasons.

From: *Name withheld from the report for privacy*

**Received:** June 11, 2013 at 1:43 P.M.

**Content:**

I have several things for this joint group. And since the article doesn't say what it is for, increase in training or building I am going to put in my two cents worth.

1. How come the citizens, that live within 5 - 10 miles of Quantico and feel the earth shake so bad you can, at times see toys and even your car bouncing and moving in your yard and have broken windows and mirrors, were never notified of this meeting? It says it wants input from the public it affects, but yet the public it affects was never informed. Someone could have gone door to door and left flyers if you didn't want to mail a letter.

"Wednesday night, they will seek "local input and comments from the community" in Fauquier"  
Hypocritical isn't it.

Or is it only a certain few that you want attending these meeting just so you can say "it was open to the public and no one came" or another of the government, and I mean county government along with the Federal government, not wanting people to know until it is to late to do anything. Or, let only the people know that will be making money it, i.e. developers, etc. know and not the real citizens that have to live here." If someone had not called me and told me to go online and look I wouldn't have known about it either. And since it is tomorrow night, and I have a previous engagement that can't be changed, I can't attend either, but trust me I would love to have been there. I say shame on whoever set this up for not letting every household in the southern end of Fauquier, northern Stafford and the county of Prince William know of this meeting. The shame lies with Stafford, Prince William, Fauquier and most of all the US Government, Quantico, for not informing the citizens this will affect, that any growth done on Quantico will affect, and I don't mean building buildings. Not every household, especially in my area, has computers nor would even know to go look for something like this nor does everyone get the papers. An expense a lot of people do without.

2. Having lived my whole life within a few miles of Quantico, in fact some of my family's land, long before I was born, was taken for Quantico, and a family cemetery is on Quantico and a husband that worked on Quantico for over 30 yrs, I am used to the bombing, the helicopters etc. that goes along with living there, and know that it is training soldiers to protect me and my rights and I still love to see the flares, I don't have a problem with that. My children, when they were young, would run outside to see the helicopters and wave to the pilots. But, if they are going to be doing more and much stronger bombs, etc. then I feel they should take responsibility for the problems this is going to cause to the lives of those already living near it. and the destruction of personal property. I have had a mirror actually split in half, on the wall and then fall, from one of the bombs that went off and actually thought it was an earthquake, with the way everything in the house was shaking and falling and even cabinet doors coming open. The earthquake in Mineral didn't cause as much damage. They just keep getting louder and louder and stronger and stronger. With the growth that has occurred, and the counties letting developers build houses, etc. maybe it is getting to strong for the area. I know the base was there first, but it was never like this and it was never intended to be like this. I remember as a kid in school a man from Quantico came and talked to our class about the government taking the land, and why, and what Quantico was intended to be used for and it was not for these strong bombs going off. Then the southern end of Fauquier and northern part of Stafford was farmland, very rural, not anymore, and definitely not 610 in Stafford.
3. And do I think that anything I say or for that matter any other "lowly" citizen says, will make a difference, NEVER. Cut and dry long before these meetings. As a school board member said recently, "this meeting is being held because we have to, our mind is already made up".

## E. Media Coverage
