(Check one – see next page for plan submittal checklists)

- Automatic Sprinkler System
- Fire Alarm System
- Alternative Fire Extinguishing System
- Underground Fire Line or Standpipe System
- Other Fire or Life Safety System

Hard copy of approved plans requested.

*ALL plans and design documents MUST be submitted on a CD in PDF format for review. Approved plans will be returned on a CD in PDF format unless this box is checked **AND** hard copies are submitted for stamping.*

PROJECT INFORMATION (Complete only the information that applies to this permit application):

Automatic Sprinkler System:

- Sprinkler System Light Hazard
- Sprinkler System Ordinary Hazard or Rack Storage
- Sprinkler System Extra Hazard
- NFPA 13R System
- NFPA 13D System

of Sprinkler Heads

of Limited Area Sprinklers

of Dry Pipe/Pre-Action Valves

Fire Pumps

Backflows Prevention Devices

Contractor Certified for Backflow

Alternative Fire Extinguishing System:

of Kitchen Hood Suppression Systems

of Carbon Dioxide Ext Systems

of Clean Agent Ext Systems

of Chemical (Dry/Wet) Ext Systems

Other Fire/Life Safety Systems

of Smoke Control Systems

of Delayed Egress Devices

of Devices Other Fire /Life Safety Systems

Underground Fire Line or Standpipe Systems:

of Underground Fire Lines

of Standpipe Systems

of Standpipes

Fire Alarm Systems:

of Fire Alarm System Devices

Elevator Recall Included

TIME LIMITATION OF APPLICATION

Virginia Uniform Statewide Building Code 108.8

An application for a permit for any proposed work shall be deemed to have been abandoned six months after the date of filing unless such application has been pursued in good faith or a permit has been issued, except that the building official is authorized to grant one or more extensions of time if a justifiable cause is demonstrated.

APPLICANT INITIALS: _____

APPLICANT AGREEMENT

All information on this form is part of the application and must be complied with. I hereby certify that I have authority to make this application, that the information is complete and correct and that the work performed and equipment installed will conform to the Virginia Uniform Statewide Building Code and other applicable laws and regulations which relate to the property.

PLAN SUBMITTAL CHECKLIST

The following checklists are provided as a GUIDE to the applicant regarding the minimum information required on Fire Protection System plans. These lists are not intended to illustrate the only requirements but rather to highlight the common items that often must be included. In all cases, the design documents must illustrate compliance with the applicable code and standards and the requirements therein.

Ensure that all applicable items are provided for the type of permit requested.

Automatic Sprinkler System:

- The approved address of the location (Number, Street Name, Suite #)
- The stamp or signature, license number and contact information of the design professional (Minimum NICET III, IV or P.E.).
- An illustration of the location of the work within the overall site, or building.
- Description of the "Scope of Work" and clear illustration of the areas not included.
- Building floor plan (to scale) indicating size, type and location of rooms and building components including fire walls, partitions, ceilings, stairs, concealed or non-combustible spaces, building equipment (obstructions), and other related items.
- Hazard classification including commodity classification and storage arrangement (type, height, fixed or rack, aisle spacing and flue space if applicable). An attached letter or paragraph format may be most effective.
- The type, location and size of all piping, valves, sprinklers and other components.
- The sprinkler legend shall provide the following information: type, symbol, SIN, temperature classifications, orifice size, K-factor, manufacturer, and quantity.
- Details (including all devices such as risers and valves, backflow prevention, pumps and FDC interconnection).
- Hydraulic calcs and illustration of calc-plates where required by NFPA 13.
- For modifications or additions, the original design information including remote area, design density, hazard classification, system type, etc.
- Capacities and pressure settings (normal, alarm, high, low, etc.) for dry or pre-action systems.
- Indicate the latest water supply data available from the Stafford County Department of Utilities at 540-658-8616.
- Equipment cut-sheets and specifications for ALL components.

Fire Alarm System:

- The approved address of the location (Number, Street Name, Suite #).
- The stamp or signature, license number and contact information of the design professional (Minimum NICET III, IV or P.E.).
- An illustration of the location of the work within the overall site, complex or building.
- The "Scope of Work" being performed (including the number of devices).
- Building floor plan (to scale) indicating size, type and location of rooms and building components including fire walls, partitions, ceilings, stairs, concealed or non-combustible spaces, building equipment (obstructions), and other related items.
- The type and location of ALL devices (include the height from the finished floor where applicable).
- The method, listing and contact information of the system supervision per NFPA 72.
- Identification of the system zones (fire alarm zones must be coordinated with sprinkler zones).
- A component wiring riser diagram and wiring runs illustrated on the plans.
- Complete battery and voltage drop calculations for ALL applicable devices.
- A sequence of operations matrix illustrating the function of all initiating devices or other components and the related action or interface with other building systems.
- Equipment cut-sheets and specifications for ALL components.

Alternative Extinguishing System:

- The approved address of the location (Number, Street Name, Suite Number).
- The stamp or signature, license number and contact information of the design professional.
- An illustration of the location of the work within the overall site, complex or building.
- Description of the "Scope of Work" and clear illustration of the areas not included.
- Building floor plan (to scale) indicating the type, location and size of all piping, nozzles and other components. Include the details and dimensions of the room or area and the appliance or equipment protected. Isometric and/or elevation views may be required.
- The type, location, quantity and function of detecting devices (fusible links, detectors, etc) including temperature classifications.
- The type and quantity of extinguishing agent with the corresponding calculations or equipment cut sheets to determine agent quantity.
- The location and type of all alarms, manual actuation devices, means of egress and portable fire extinguishers.
- The method of utility (electric, gas, etc) shut down and system interconnection to the associated equipment, exhaust fans, and building fire alarm system.
- Equipment cut-sheets and specifications for ALL components.

Underground Fire Line or Standpipe System:

- The approved address of the location (Number, Street Name, Suite Number).
- The stamp or signature, license number and contact information of the design professional.
- An illustration of the location of the work within the overall site, complex or building
- Description of the "Scope of Work" and clear illustration of the areas not included
- A site or building plan (to scale) indicating the location, type and size of all piping and valves.
- Any design details for valve arrangements, fire department connections or signage.
- The depth of cover and change in elevation of piping.
- Any construction specifications notes including wrapping of pipe, pipe restraints, thrust blocks, etc.
- Equipment cut-sheets and specifications for ALL components.

Other Fire or Life Safety System:

- The approved address of the location (Number, Street Name, Suite Number).
- The stamp or signature, license number and contact information of the design professional.
- An illustration of the location of the work within the overall site, complex or building.
- Description of the "Scope of Work" and clear illustration of the areas not included
- Building floor plan (to scale) indicating size, type and location of rooms and building components including fire walls, partitions, ceilings, stairs, concealed or non-combustible spaces, building equipment and other related items.
- The type, location, quantity and function of all devices or system components
- Equipment cut-sheets and specifications for ALL components.

SIGNATURE:

I hereby certify that the design documents submitted complies with the above checklist and the following VUSBC, VSFPC and NFPA Standards (edition): _____

Name: _____ Signature: _____ Date: _____

NOTICE

Stafford County treats all applications and applicants equally. The County does not discriminate against religion, or on the basis of race, sex, age, national origin, or disability, in its planning, permitting, utilities, and land use processes.

Under the laws of the United States and the Commonwealth of Virginia, no government may discriminate against any religion or on the basis of race, sex, age, national origin, or disability, in its planning, permitting, utilities, and land use processes.

Under the Religious Land Use and Institutionalized Persons Act ("RLUIPA"), no government may apply its zoning or land use laws, or its policies and procedures in a manner that unjustifiably imposes a substantial burden on the religious exercise of a person, assembly, or institution.

RLUIPA also provides that no government may apply its zoning or land use laws in a manner that treats a religious assembly or institution on unequal terms with a non-religious institution or assembly.

Finally, RLUIPA provides that no government may impose or implement a land use regulation in a manner that discriminates against a religious assembly or institution.

Stafford County does not discriminate in its planning, permitting, utilities, and land use processes, practices, and policies. Stafford County treats all applications and applicants equally.
